Shielded FDG Toilet

Product description.

The Shielded FDG Toilet is designed for hospitals without a shielded water waste treatment; the waste water can be kept in a shielded compartment till the radioactivity is under the maximum allowed level.

It features a full size toilet with automatic flush and can be installed in every room with a electrical outlet no water supply or sewer needed.

Features:

Dimensions: 458x670x400 mm (HxWxD)
Waste tank: 19.3 liter
Fresh water tank: 15 liter
Automatic flush
Lead shield up to 30mm
