## CLIP-LOCK SYRINGE SHIELDS

shielding: tungsten

Tungsten syringe shield for 1 ml syringe with clip-lock to secure the syringe into position during the elution process. The anodized aluminum outside finishing optimizes the ability to decontaminate the syringe shield. The lead glass viewing window has a density of 5.2 and is large enough to provide good visibility of the syringe. This syringe shield has 2 mm tungsten shielding to provide excellent attenuation.

- - Easy to decontaminate
- - Good vision of syringe content
- - Clip-lock security
